

Name _____

In-Class Activity: Vesuvius Erupts: Based on *information in the newsreel video* about the 1944 eruption of Mount Vesuvius, describe two hazards associated with the eruption's lava flows and two hazards associated with the eruption's ash cloud. Critically analyze the information when deciding what kind of hazard the phenomenon would be (e.g., would it be more dangerous to people, property or something else).

Use complete sentences to describe the hazards associated with each phenomenon.

Lava:

Ash Cloud:
