

NOT A LOT OF PEOPLE KNOW THAT

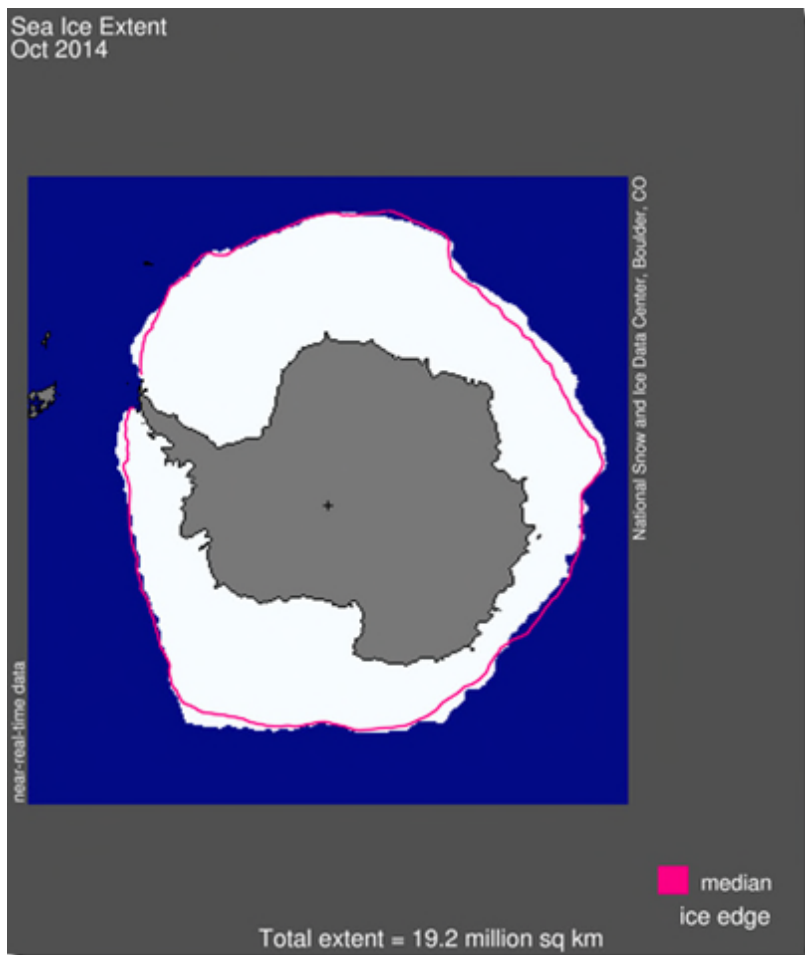

“We do not believe any group of men adequate enough or wise enough to operate without scrutiny or without criticism. We know that the only way to avoid error is to detect it, that the only way to detect it is to be free to inquire. We know that in secrecy error undetected will flourish and subvert”. – J Robert Oppenheimer.

Antarctic Sea Ice Extent Second Highest On Record In October.

NOVEMBER 4, 2014

http://nsidc.org/data/seaice_index/index.html (http://nsidc.org/data/seaice_index/index.html)

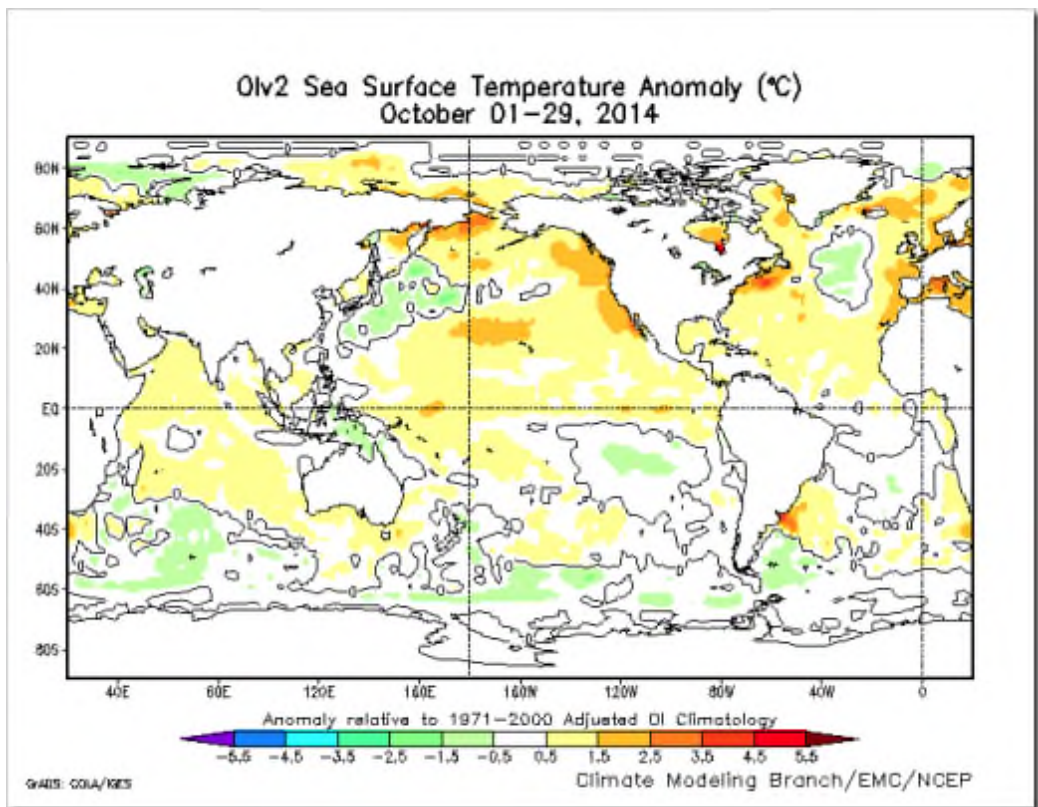

Antarctic sea ice extent just slipped below last year's record level, but was still the 2nd highest October extent in the modern satellite record. At the end of the month it measured 18.208 million sq km, 768,000 sq km above the 1981-2010 average.

http://nsidc.org/data/seaice_index/index.html (http://nsidc.org/data/seaice_index/index.html)

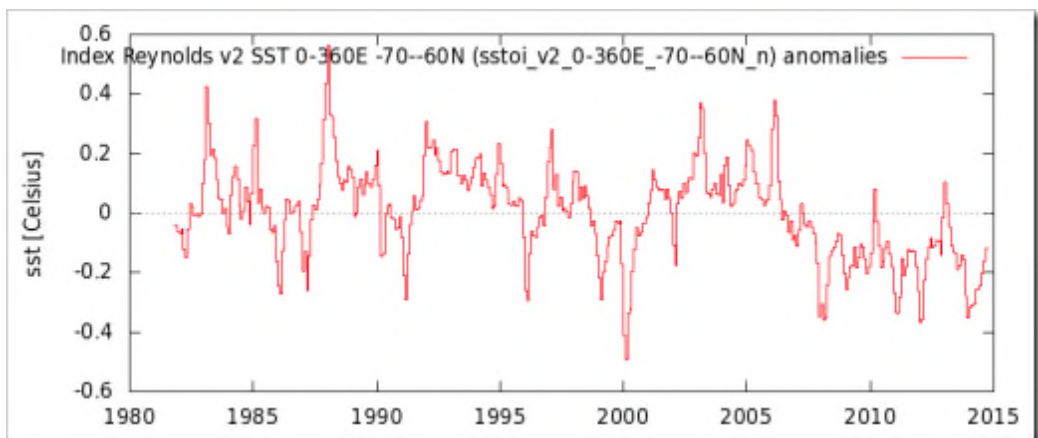

With Southern Ocean SST's still well below normal, where they have been for most of the last eight years, ice extent is likely to remain near to record levels over the Antarctic summer.

http://climexp.knmi.nl/select.cgi?id=someone@somewhere&field=sstoi_v2 (http://climexp.knmi.nl/select.cgi?id=someone@somewhere&field=sstoi_v2)

http://climexp.knmi.nl/selectfield_obs.cgi?someone@somewhere (http://climexp.knmi.nl/selectfield_obs.cgi?someone@somewhere)

With Arctic ice extent just 6% below average at the end of October, global sea ice area remains just above normal.

Triggered by the prayers of Mark Serreze and his acolytes wanting something to reduce Arctic sea ice from it's near normal levels?
